Experience

Uniqode

Software Engineer

August 2023 - Present

Bangalore, Karnataka

- Directed the migration of the website to **Next.js**, incorporating features like **server-side rendering**, leading to a 70% boost in **SEO performance** and significantly lowered bounce rates.
- Introduced the **bulk creation** process of cards by CSV/Excel file uploads. Both these features lead to a **direct growth in revenue** by closing deals with large enterprise customers.
- Analyzed **Content Security Policy (CSP)** values for websites, enhancing security protocols and mitigating risks associated with **cross-site scripting (XSS)** attacks.
- Led a pivotal role in developing the **QR Code Generator widget** for the company website, significantly enhancing product showcase capabilities and user engagement..
- Managed the **GitHub CI/CD pipeline**, integrating automated tests and ensuring seamless deployment processes.
- Directed Front-End development for the company's latest acquisition of the **T-QRCG** platform, demonstrating proficiency with diverse technologies.
- Introduced multiple **Gulp automation** scripts, streamlining build processes and cutting down manual tasks, which resulted in a 40% increase in overall team productivity and saved 20+ hours weekly.

Uniqode

Software Engineer Intern

January 2023 - July 2023

Bangalore, Karnataka

- Spearheaded** the integration of **PartnerStack CRM** into the website, while also overseeing and capturing user journeys on the landing pages and increased SEO outreach team performance by 45%.
- Engineered comprehensive testing suite using **DataDog**, seamlessly integrated into the **GitHub CI/CD pipeline**, and established **real-time communication channels via Slack**, reducing deployment errors by 40% and improving team collaboration efficiency by 30%.
- Worked closely with business analysts to understand and implement test scenarios that **reflect real-world use cases** and wrote **APIs** for the user dashboard list and filter views.
